Shave Biopsy Aftercare Instructions

- Leave Band-Aid on overnight.
- Starting day after procedure, remove Band-Aid and gently wash the area with soap (Dove and Cetaphil are good brands) and water.
- Pat the area dry.
- Apply Vaseline or antibiotic ointment (polysporine or double antibiotic ointment are preferred over Neosporine).
- Apply a new Band-Aid.
- Repeat Band-Aid change every day until the area is healed. This usually takes 2 weeks.
- Protect the area from the sun with high SPF sunscreen and/or a Band-Aid until it is no longer pink. This usually takes about 2 months.
